

The DeKalb Public Library, as the cornerstone of a growing and dynamic community, provides easily accessible information and a welcoming environment to all its patrons. In order to extend this standard of service, the Library's Board of Trustees has resolved unanimously to expand and improve the Library's services and facilities. To this end, the Board has hired two consulting firms, both of which recommend that the Library's physical space be increased from 19,000 to 60,000 square feet. The Board of Trustees will continue to explore all available options for increasing the Library's holdings, programming initiatives, and physical space.
